Please send the completed questionnaire by electronic mail to [UEAPME Study Unit g.huemer@ueapme.com](mailto:g.huemer@ueapme.com)

Part I

UEAPME – Think Small Test

UEAPME has demanded for years to respect the “Think Small First” principles as regards legislation, public administration and business support services. Policy decisions should be targeted to the majority of enterprises (99.8% of all enterprises are SMEs, 91.4% are micro enterprises) and not to few large companies.

With the European Small Business Act (SBA) presented by the European Commission in June 2008 and endorsed by the Competitiveness Council in December 2008, the European Institutions gave for the first time a strong commitment to implement the “Think Small First” principle at European **and** national / regional / local level.

The **UEAPME – Think Small Test** aims to assess regularly to which degree the commitments to use the “Think Small First” principles have been fulfilled by policymaker at all levels.

Therefore, UEAPME would like to invite as many persons working for Craft and SME organisations (including regional and branch associations) in all Member States to fill in this questionnaire once a year (each January), which will provide us with the necessary information to assess the degree of compliance with the “Think Small First” commitments of policy maker all over the European Union.

Please follow these rules, if you answer the questionnaire:

- The questionnaire should be only answered by people, who **represents or works for a Craft or SME association** in one of the 27 Member State of the EU.
- One person may answer **only one questionnaire**.
- Please fill-in **all fields marked in colour**.
- The questions should be answered in January and the answers should relate to the **current situation** and the **measures take during the past year**.
- **Please answer all questions**, but fill-in or tick “N/A” (no answer, not applicable, don’t know) for issues on which you have no experience or knowledge.
- Please send the questionnaire back b e-mail to g.huemer@ueapme.com

I. Questions to test the respect of the “Think Small First” principles

* Please score for Situation: **-2 / -1 / 0 / +1 / +2**
 from **-2 (for very bad)** to **+2 (for excellent)**
 or **N/A** (for not applicable, no answer, don't know)

Situation *
 Please score
 -2/-1/0/+1/+2

Have any **policy measures** been taken in this area during the last year?

Tick a box

Yes	No	N/A
-----	----	-----

Results of these measures?

Pos = situation has improved
 0 = situation is unchanged
 Neg = situation got worse

Tick a box

Pos	0	Neg	N/A
-----	---	-----	-----

1. “Think Small First” principles in the legislative process

Effective and independent impact assessment on the effects of new legislation on enterprises in general	
Specific impact assessment on Crafts / SMEs	
Consultation of Craft/SME associations on new legislative proposals	
Influence of comments and proposals from Craft/SME associations in the legislative process?	
Implementation of the “only once principle” (businesses have to provide the same information only once to the administration)?	
Exemption from administrative or compliance requirements for SMEs	

2. “Think Small First” principles in administration

Existence and accessibility of “e-government solutions” for SMEs	
Existence of offer one-stop-shops to simplify administration for SMEs	

3. “Think Small First” principles in business support services:

Existence of SME friendly start-up services	
Existence of SME friendly training offers	
Existence of SME friendly labour market services	
SME friendly support measures to get access to finance	
SME friendly support measures to get access to standards	

Part II

UEAPME – Scoreboard on the implementation of the SBA at national level

The European Small Business Act (SBA), presented by the European Commission in June 2008 and endorsed by the Competitiveness Council in December 2008, set out 10 principles and priority areas, which aim to improve significantly the business environment for Crafts and SMEs in Europe.

This **UEAPME – Scoreboard on the implementation of the SBA at national level** aims to assess on an annual base the degree to which the commitments and promises included in the SBA have been implemented in the Member States of the European Union. Furthermore, this SBA scoreboard together with the Think Small Test will be an important policy tool also for national associations to keep pressure on politicians to improve the situation for Crafts and SMEs in their countries.

Therefore, UEAPME would like to invite as many persons working for Craft and SME organisations (including regional and branch associations) in all Member States to fill in this questionnaire once a year (each January), which will provide us with the necessary information to assess the degree of compliance with the TSF commitments of policy maker all over the European Union.

Please follow these rules, if you answer the questionnaire:

- The questionnaire should be only answered by people, who **represents or works for a Craft or SME association** in one of the 27 Member State of the EU.
- One person may answer **only one questionnaire**.
- Please fill-in **all fields marked in colour**.
- The questions should be answered in January and the answers should relate to the **current situation** and the **measures take during the past year**.
- **Please answer all questions**, but fill-in or tick “N/A” (no answer, not applicable, don’t know) for issues on which you have no experience or knowledge.
- Please send the questionnaire back b e-mail to g.huemer@ueapme.com

II. Questions on the different priority areas in the Small Business Act

* Please score for Situation: **-2 / -1 / 0 / +1 / +2**
 from **-2 (for very bad)** to **+2 (for excellent)**
 or **N/A** (for not applicable, no answer, don't know)

Situation *
 Please score
 -2/-1/0/+1/+2

Have any **policy measures** been taken in this area during the last year?

Tick a box

Yes	No	N/A
-----	----	-----

Results of these measures?

Pos = situation has improved
 0 = situation is unchanged
 Neg = situation got worse

Tick a box

Pos	0	Neg	N/A
-----	---	-----	-----

1. Promoting of entrepreneurship

Entrepreneurship is a key principle in school curricula	
Cooperation between the business community and schools	
Taxation systems support the transfer of businesses
