

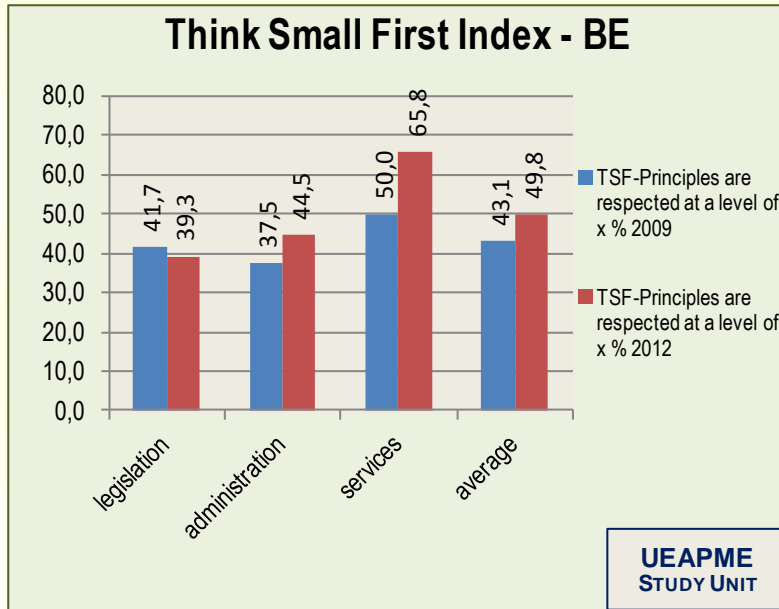

Chart 1

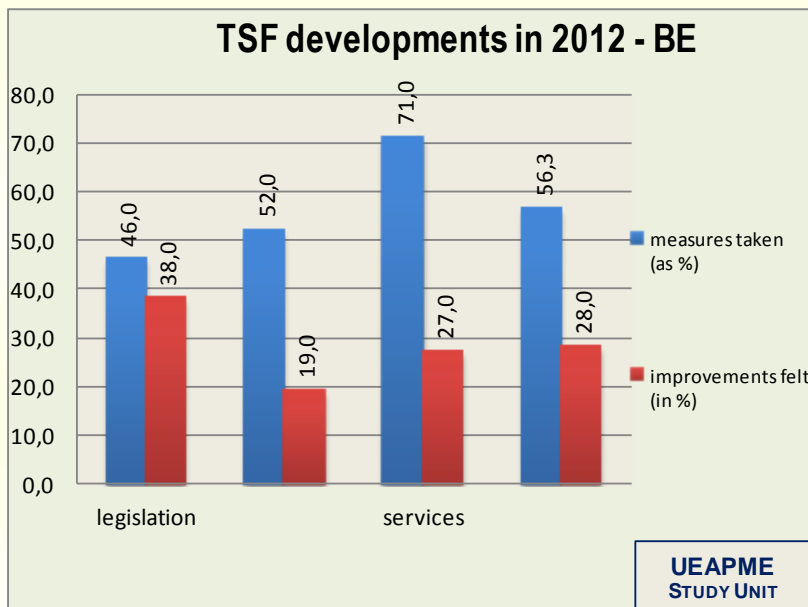

The **UEAPME Think Small Test** and the **SBA implementation Scoreboard** assess the degree to which public institutions in the EU are respecting their promises to respect the Think Small First Principles and to implement the commitments made within the Small Business Act.

The figures are based on judgements made by SME policy experts from Craft and SME associations all over Europe. The results show the degree, to which the commitments have been respected, the level of activity (measures) during the last year and its effects (improvements). More results and information can be found at the [UEAPME website](http://ueapme.eu).

The **Country Sheets** present the findings for the 16 Member States their national association participated at this exercise. Even the chosen analytical method (personal judgements) does not allow real comparisons between countries, the relative deviation from the European average, shown by the “Radar” on page 2, gives **indications about relative strengths and weaknesses of the country**.

Chart 2

Relatively strong results for:

- The existence of national targets for the reduction of administrative burdens on businesses
- Availability of information on Public procurement opportunities for SMEs
- Cooperation between the business community and schools

Relatively weak results for:

- State aid measures for energy saving for SMEs
- Support measures to find international partners
- Affordable prices of European and international standards
